Liquid chromatography (HPLC), formerly referred to as high-pressure liquid chromatography, is a technique in analytical chemistry used to separate, identify, and quantify each component in a mixture. It relies on pumps to pass a pressurized liquid solvent containing the

9780956152800 - An Introduction to Hplc for Pharmaceutical ...

HPLC injection is a technique used to load the sample into the HPLC system.

This process is done using a specially designed injection

Download Free An Introduction

system which is a separate and prominent part of the HPLC system. The most popular injector is the rheodyne injector. The injection is done manually by an external syringe or autoinjector.

HPLC injection: The technique and instrumentation

Download Free An Introduction

HPLC is a technique that employs a liquid mobile phase.

Stationary phases are typically chemically modified inorganic silicas or polymeric beads packed into a column. In HPLC, the separation mechanism that partitions components of a sample between the two phases can

Download Free An Introduction

take many forms,
depending on the
nature of the samples
and the phases
employed.
