Cochran
complexes in the Fall of 1990. This study tracked energy usage before and after O & M training to see if savings occurred.

Training was provided on both weatherized and non-weatherized apartments to find out if weatherization impacted the amount of O & M savings to be obtained. Also, energy savings from the

Online Library Boiler Training Operation And

O & M training and building shell weatherization are compared. The O & M training averaged about four hours per building. Content was adjusted at each site to match needs of the boiler and operator. The Energy Office also provided a boiler tune-up by a service technician. The training stressed low-cost and no-cost

Online Library Boiler Training Operation And Maintenance Courses

measures which operators could either do themselves or hire service help to implement. It also emphasized boiler safety. Nine of the ten apartment complexes in the study used less energy per heating degree-day after the O & M help. Average savings were 10%. Four apartments chosen randomly as controls

Online Library Boiler Training Operation And Maintenance Courses

had negative savings; they used slightly more energy during the same post-O & M time frame. Weatherized and unweatherized apartments showed similar savings after the O & M help, 10% and 11% percent respectively. Savings from weatherization of six of the apartments in the winter of 1988--1989 were also

Online Library Boiler Training Operation And Maintenance Courses

measured. A low average of only 4% was observed, reflecting negative savings in two buildings.
