Drug Dosage Calculation Formulas. To calculate the number of tablets, use the following formula: $\text{Strength required} / \text{Stock strength} = \text{Number of tablet(s) required}$. Or another way this drug dosage formula can be expressed is: $\text{What you want} / \text{What you 've got} = \text{Number of tablet(s) required}$. To calculate the volume dose for liquid medicine, use this formula: $(\text{Strength required} / \text{Stock strength}) \times \text{Stock}$
