A thoroughly revised and updated standard work on the Canon law of the Roman Catholic Church and the Church of England, this work now includes a list of Eastern Catholic Churches which are fully Catholic in so far as they are in full communion with the Roman pontiff. On the Anglican side, there is a list of Churches which comprise the Anglican Communion, and the changes brought about by the Churchwardens Measure (2001), the Clergy Discipline Measure (2003) and Ecclesiastical Offices (Terms of Service) Measure (2009) have been included.

Sentiment analysis and opinion mining is the field of study that analyzes people's opinions, sentiments, evaluations, attitudes, and emotions from written language. It is one of the most active research areas in natural language processing and is also widely studied in data mining, Web mining, and text mining. In fact, this research has spread outside of computer science to the management sciences and social sciences due to its importance to business and society as a whole. The growing importance of sentiment analysis coincides with the growth of social media such as reviews, forum discussions, blogs,

micro-blogs, Twitter, and social networks. For the first time in human history, we now have a huge volume of opinionated data recorded in digital form for analysis. Sentiment analysis systems are being applied in almost every business and social domain because opinions are central to almost all human activities and are key influencers of our behaviors. Our beliefs and perceptions of reality, and the choices we make, are largely conditioned on how others see and evaluate the world. For this reason, when we need to make a decision we often seek out the opinions of others. This is true not only for individuals but also for organizations. This book is a comprehensive introductory and survey text. It covers all important topics and the latest developments in the field with over 400 references. It is suitable for students, researchers and practitioners who are interested in social media analysis in general and sentiment analysis in particular. Lecturers can readily use it in class for courses on natural language processing, social media analysis, text mining, and data mining. Lecture slides are also available online.

Table of Contents: Preface / Sentiment Analysis: A Fascinating Problem / The Problem of Sentiment Analysis / Document Sentiment Classification / Sentence Subjectivity and Sentiment Classification / Aspect-Based Sentiment Analysis / Sentiment Lexicon Generation / Opinion Summarization / Analysis of Comparative Opinions / Opinion Search and Retrieval / Opinion Spam Detection / Quality of Reviews / Concluding Remarks / Bibliography / Author Biography

This original book is a comprehensive, richly documented and critical examination of laws applicable to Anglican cathedrals in England, some of the most iconic monuments in the national heritage and centres of spiritual and cultural capital. Law is the missing link in the emerging field of cathedral studies. The book fills this gap. It explores historical antecedents of modern cathedral law, traces aspects of them that still endure, and explains the law with particular reference to the recommendations of the Archbishops' Commission on Cathedrals 1994 which led to the most radical changes in the legal history of these churches since the Reformation, culminating in the Cathedrals Measure 1999 and associated later legislation. The book compares the domestic constitutions and statutes of all the cathedrals of the Church of England today – old foundations, new foundations and parish church cathedrals – as well as policies and guidelines applicable to or adopted by them. Whilst national law acts as a fundamental unifying force, there is considerable diversity as between these in terms of the breadth and depth of their coverage of topics. In the socio-legal tradition, the book also explores through interviews with clergy and others, at half of the cathedrals, how laws are experienced in practice. These reveal that whilst much of the law is perceived as working well, there are equally key areas of concern. To this end, the book proposes areas for further research and debate with a view to possible reform. Taking an architectural feature of cathedrals as the starting point for each chapter, from cathedral governance through mission,

ministry, music and education to cathedral property, what emerges is that law and architecture have a symbiotic relationship so that a cathedral is itself a form of juristecture.

A practical, jargon free guide to key aspects of canon and public law for clergy, readers, churchwardens, PCC members and diocesan officers, covering common situations that affect every church. Now updated to include Common Tenure, the Marriage Act and government changes in vetting those who work with children and vulnerable adults.
