TextBook International Law And Foreign Affairs In English ...

It was the "law of nations" that justified territorial conquest, the seizure of foreign ships, and the imposition of discriminatory trade regimes. Later, in the twentieth century, international law aided those struggling against empires and for self-determination. So in the end, international law proved both a tool of the powerful and a weapon of the weak.

International law, also known as public international law and law of nations, is the set of rules, norms, and standards generally accepted in relations between nations. It establishes normative guidelines and a common conceptual framework to guide states across a broad range of domains, including war, diplomacy, trade, and human rights. International law allows for the practice of stable, consistent, and organized international relations.
