Written and edited by an international team of authors based primarily in Europe, the book is divided into four thematically-organised sections. The first part delineates the evolution of American Studies over the course of the twentieth century, the second elaborates on how American Studies as a field is positioned within the wider humanities, and the third inspects and deconstructs popular tropes such as myths of the West, the self-made man, Manifest Destiny, and representations of the President of the United States. The fourth part introduces theories of society such as structuralism and deconstruction, queer and transgender theories, border and hemispheric studies, and critical race theory that are particularly influential within American Studies. This book is supplemented by a companion website offering further material for study ([www.routledge.com/cw/dallmann](http://www.routledge.com/cw/dallmann)).
