Financial Risk Management and Derivative Instruments offers an introduction to the riskiness of stock markets and the application of derivative instruments in managing exposure to such risk.

Structured in two parts, the first part offers an introduction to stock market and bond market risk as encountered by investors seeking investment growth. The second part of the text introduces the financial derivative instruments that provide for either a reduced exposure (hedging) or an increased exposure (speculation) to market risk. The fundamental aspects of the futures and options derivative markets and the tools of the Black-Scholes model are examined. The text sets the topics in their global context, referencing financial shocks such as Brexit and the Covid-19 pandemic. An accessible writing style is supported by pedagogical features such as key insights boxes, progressive illustrative examples and end-of-chapter tutorials. The book is supplemented by PowerPoint slides designed to assist presentation of the text material as well as providing a coherent summary of the lectures. This textbook provides an ideal text for introductory courses to derivative instruments and financial risk management for either undergraduate, masters or MBA students.

Most macroeconomists agree that we live in the age of microfoundations. The recent worldwide financial crisis may have emboldened critics of this microfoundational orthodoxy, but it remains the dominant view that macroeconomic models must go beyond supply and demand functions to the level of individual decision-making, taking into account the general dynamic environment where agents live. *Microfoundations Reconsidered* seeks to reassess how the relationship of micro and macroeconomics evolved over time. The highly regarded contributors to the book argue that the standard narrative of microfoundations is likely to be unreliable. They therefore re-examine the history of the relationship of microeconomics and macroeconomics, starting from their emergence as self-consciously distinct fields within economics in the early 1930s. They seek to go beyond the conventional history that is often told and written by practicing economists. From different perspectives they challenge the association of microfoundations with Robert Lucas and rational expectations and offer both a more complete and a deeper reading of the relationship between micro and macroeconomics. *Microfoundations Reconsidered* is a valuable addition to the macroeconomic research literature. It is ideally suited to students, scholars, researchers, and practitioners with an interest in macro and microeconomics and the history of economics.

Last year, author Lysa TerKeurst released the book *Made to Crave*, providing the Biblical answer to why people diet, regain the weight they lose, and continue to find themselves stuck in this vicious cycle. *Made to Crave* helped thousands of people finally achieve victory in their weight loss journey. But, according to TerKeurst, “We need more than 19 chapters to stay motivated and on track. That’s why I wrote this daily devotional with 60 inspirational entries. There is plenty of new material not in the original book. Rest assured, I also included your favorite nuggets of wisdom from *Made to Crave*.” Just like the *Made to Crave* book, this *Made to Crave Devotional* is not a how-to get healthy book. It is the road to finding the lasting ‘want to’ that extends far beyond the surface issues of weighing less and wanting to wear a smaller clothes size. Says TerKeurst: “There’s a spiritual battle going on. It’s real. And it’s amazing how perfectly the Bible gives us specific ways to find victory with our food struggles. “Even for girls who don’t crave carrots.”
