Violence in Gay and Lesbian Domestic Partnerships provides a comprehensive analysis of same-sex domestic violence, addressing the major theoretical and treatment issues for both its victims and perpetrators. Its contents raise awareness among social service providers, of the problem of same-sex domestic violence and emphasize the need for special services for both victims and perpetrators. The publication of Violence in Gay and Lesbian Domestic Partnerships signifies the growing official recognition of domestic violence within lesbian and gay relationships as a social problem worthy of serious attention and intervention. Editors Renzetti and Miley begin by providing readers with an overview of the problem of same-sex domestic violence and the responses of the domestic violence movement and other social service providers. Chapters then move to discussions of the current scarcity of services available to lesbian and gay victims and perpetrators of domestic violence and then evaluate specific treatment modalities for these client groups. Significantly, the special needs of lesbians and gays of color and those with HIV/AIDS are discussed. Chapters contain: an historical overview of the study of same-sex domestic violence a review and evaluation of theoretical explanations of same-sex domestic violence an analysis of major problems in service provisions to gay and lesbian victims of domestic violence suggestions for and

evaluations of specific treatment modalities an analysis of how racism intersects with homophobia to exacerbate the consequences of domestic violence an analysis of the role of HIV/AIDS in same-sex domestic violence Contributors to this volume were actively addressing the problem of same-sex domestic violence before it was officially “ discovered. ” Some were motivated by their experiences as victims and survivors of same-sex domestic violence, others by their concern about domestic violence in general. As a compilation of the writings of academics, clinicians, advocates, and activists, *Violence in Gay and Lesbian Domestic Partnerships* bridges disciplinary and occupational boundaries and promotes a dialogue across fields and specialties. *Violence in Gay and Lesbian Domestic Partnerships* is unique in that it is the only book available which comprehensively addresses the social service needs of gay and lesbian domestic violence victims and perpetrators. Specific suggestions are offered for improving service providers ’ responses to gay and lesbian victims of domestic violence. Social workers, counselors, practitioners and clinicians will find it especially useful, given that it addresses the effectiveness of particular treatment modalities for lesbian and gay victims and perpetrators.

How can we prevent intimate partner violence (IPV)? And how do we define and measure “ success ” in preventing it? This book brings together researchers and practitioners from a wide range of fields to examine innovative strategies and programs for preventing IPV. The authors discuss evaluations of current prevention efforts, paying particular attention to underserved groups, including racial and ethnic minorities, immigrants and refugees. Among the issues addressed are primary prevention programs that target adolescents and young adults, strategies designed to engage men and boys, IPV screening in different settings, the impact of the criminalization of IPV on minority populations, restorative justice programs, interventions for women who use violence, and innovative shelter programming to prevent re-victimization. The volume concludes by identifying the gaps in knowledge about effective prevention and highlighting the most promising future directions for prevention research and strategies.

Since the late 1970s when Congressman Claude Pepper held widely publicized hearings on the mistreatment of the elderly, policy makers and practitioners have sought ways to protect older Americans from physical, psychological, and financial abuse. Yet, during the last 20 years fewer than 50 articles have addressed the shameful problem that abusers "and sometimes the abused themselves" want to conceal. *Elder Mistreatment in an Aging America* takes a giant step toward broadening our understanding of the mistreatment of the elderly and recommends specific research and funding strategies that can be used to deepen it. The book includes a discussion of the conceptual, methodological, and logistical issues needed to create a solid research base as well as the ethical concerns that must be considered when working with older subjects. It also looks at problems in determination of a report's reliability and the role of physicians, EMTs, and others who are among the first to recognize situations of mistreatment. *Elder Mistreatment in an Aging America* will be of interest to anyone concerned about the elderly and ways to intervene when abuse is suspected, including family members, caregivers, and advocates for the elderly. It will also be of interest to researchers, research sponsors, and policy makers who need to know how to advance our knowledge of this problem.
