### Motoman Dx100 Programming Manual - app.wordtail.com

A good robot program will prevent the robot from performing exaggerated positions/postures and balance the motion of the torch orientation with the robot arm position. Do’s . All nonprocess moves should be joint moves (noninterpolated motion). Moves where an axis is moving more than 180 degrees should be made in two moves to ensure smooth motion. Keep the robot posture as close as possible ...
