Fission weapons are commonly referred to as atomic bombs, and fusion weapons are referred to as thermonuclear bombs or, more commonly, hydrogen bombs.

nuclear weapon | *History, Facts, Types, & Effects* | *Britannica* Nuclear weapons are manufactured principally from highly enriched uranium or plutonium. Early nuclear weapons, including the types exploded in warfare in Japan in 1945, employ the principles of nuclear fission to create a chain reaction in a critical mass of either enriched uranium or plutonium. In the simplest design, the 'gun assembly', a mass of fissile uranium is fired at a uranium target in a similar manner to firing a bullet along a gun barrel.

Nuclear weapons | *Nuclear Information Service*

In today's information age, the coexistence of nuclear weapons with advanced conventional weapons and information-based concepts of warfare is a military contradiction.Nuclear deterrence was initially predicated on geopolitical, military, and technical assumptions. These were based on Cold War politics, rational deterrence theory, the concept of mutual vulnerability, and the fact that ...

Nuclear Weapons in the Information Age: Amazon.co.uk ...

Nuclear disarmament refers to both the act of reducing or eliminating nuclear weapons and to the end state of a nuclear-free world, in which nuclear weapons are eliminated. Beginning with the 1963 Partial Test Ban Treaty and continuing through the 1996 Comprehensive Test Ban Treaty , there have been many treaties to limit or reduce nuclear weapons testing and stockpiles.

Nuclear weapon - *Wikipedia*

In his book, **Nuclear Weapons in the Information Age**, Stephen J. Cimbala, distinguished professor of political science at Penn State Brandywine and former consultant on arms control to various U.S. government agencies, argues that the ultimate weapon of the age of mass destruction and total warfare still has a critical impact on peace and security in the postindustrial age of precision warfare and reduced collateral damage.

Book Review: Nuclear Weapons in the Information Age by ...

The British government considered nuclear weapons to be a joint discovery, but the American Atomic Energy Act of 1946 (McMahon Act) restricted other countries, including the UK, from access to information about nuclear weapons. Fearing the loss of Britain's great power status, the UK resumed its own project, now codenamed High Explosive Research.

Nuclear weapons of the United Kingdom - *Wikipedia*

Nuclear Information Service is an independent, not-for-profit research organisation. We investigate the UK nuclear weapons programme and publish accurate and reliable information to stimulate informed debate on disarmament and related issues.

Home | *Nuclear Information Service*

Nuclear weapons tests are experiments carried out to determine the effectiveness, yield, and explosive capability of nuclear weapons. Testing nuclear weapons offers practical information about how the weapons function, as well as how detonations are affected by different conditions; and how personnel, structures, and equipment are affected when subjected to nuclear explosions.
