Approach your cat quietly and slowly, avoiding sudden movements. The best way of lifting an injured cat is to put one hand under the chin on the front of the chest, and the other behind the hindlegs. If the cat seems frightened and potentially aggressive, it is better to lift the cat in a thick towel, but be careful as cats can bite through towels. If you are dealing with an unknown cat, you may be able to encourage the animal into a shed or garage before seeking help.

~~Basic First Aid for Cats | Blue Cross~~

Cat first aid When your cat is in pain or suffering, knowing how to react can often make a huge difference. You'll need to try and keep a level head and take deep breaths and remain calm, as your cat will likely be stressed and scared.

~~Cat First Aid: How to Help Your Pet in an Emergency | Purina~~

Use a clean white tea towel or handkerchief, depending on the size of your cat's paw, as these have a good absorption capacity and allow you to see the bleeding more clearly. It's best not to apply a tourniquet (a very tight bandage to stop the blood flow) to the leg, as this can cause more harm than good.
