Increasingly rapid urbanization of the Philippines poses a great challenge to the country in terms of achieving sustainable urban development through informed planning and efficient implementation of strategic policies and programmes. This growth is expected to happen not only in the capital Metro Manila but mainly in small and intermediate cities.

Urbanization - UN-Habitat Philippines

The recently completed report Philippines Urbanization Review, Fostering a System of Competitive, Sustainable and Inclusive Cities, sets forth priorities for a bold reform agenda in i) addressing the binding constraints of weak institutions to improve the delivery of necessary infrastructure, services and sustainable urban planning, and ii) improving land administration management to open up ...

Unlocking the Philippines' urbanization potential

New technologies are moving us toward "production-at-the-point-of-consumption" of energy, food, and products with reduced reliance on a global supply chain. The trade of physical stuff has been central to globalization as we've known it. So, this declining movement of stuff may signal we are approaching "peak globalization."

How Technology Is Driving Us Toward Peak Globalization

Collaborative endeavor bringing together research and industry leaders to develop electric systems and rapid recharging infrastructure for heavy vehicles adapted to open-pit mining.- Leveraging Quebec's clean and affordable hydropower, Nouveau Monde is set to become the world's first all-electric open-pit mine to deliver sustainable products to its customers, with a zero-carbon footprint.
