Future Cities in the Making is a research project exploring barriers to information modelling in socially responsible cities. Techniques like Building Information Modelling (BIM) and City Information Modelling (CIM) offer great potential to aspiring smart cities for urban planning, but uptake has been limited, and the attendant challenges to data sovereignty and privacy are not well understood.

Centre for Cities Planning for the future June 2020 • Non-developed land should be phased into the zoned area, conditional on actual population growth. This approach would replace the Green Belt and end the rationing of new land for development, while still protecting precious woodland, countryside, and nature reserves.
