## Standard of Care: Tibial Plateau Fracture

No resisted leg extension machines (isotonic or isokinetic) at any point.

\*Use the bone stimulator once per day (preferably at same time each day) for 30 minutes for 3 months. \*Use the CPM set at 0 to 50 degrees for 6 hours a day for 4 weeks. Week 1

## Tibial Plateau Fracture Surgery Rehab Protocol & Recovery

In the first stage of rehabilitation from a tibial plateau fracture, your knee must be immobilized for six to eight weeks to allow your tibial plateau to heal. Stage 2 Once your tibial plateau has fused together, your cast or hard brace may be removed. This marks

the end of the first stage of rehab and the beginning of the second.

### Rehabilitation From Tibial Plateau Knee Surgery | Healthfully

Surgical treatment of a displaced tibial plateau fracture usually involves open reduction and internal fixation (ORIF) of the tibial plateau fracture. Open reduction refers to open surgery to realign the bones and internal fixation refers to fixation of screws and/or plates to hold the affected bones in place and to help support the fracture.

around the broken bone fragments to keep them secure.

### Diagnosis & Treatment for Fractured Tibial Plateau or ...

Initially, sports injury treatment using the P.R.I.C.E. principle – Protection, Rest, Icing, Compression, Elevation can be applied to a tibial plateau fracture. Nondisplaced fractures of the tibial plateau can often be treated non-operatively with a period of non-weight bearing with a hinged knee brace.

### Tibial Plateau Fracture - Sports Injuries, treatment and ...

Treatment is supportive. A backslab can be applied. An above-knee walking cast for 4 weeks is optional. Fracture clinic in 2 weeks with x-ray. Undisplaced tibial shaft fracture. No
