that is not limited to a specific set of values but can vary, without steps, across a continuum. The word was first used scientifically in optics to describe the rainbow of colors in visible light after passing through a prism. As scientific understanding of light advanced, it came to apply to the entire electromagnetic spectrum.

## Spectrum - Wikipedia

Spectrum definition is - a continuum of color formed when a beam of white light is dispersed (as by passage through a prism) so that its component wavelengths are
