Before the Internet became widely known as a global tool for terrorists, one perceptive U.S. citizen recognized its ominous potential. Armed with clear evidence of computer espionage, he began a highly personal quest to expose a hidden network of spies that threatened national security. But would the authorities back him up? Cliff Stoll's dramatic firsthand account is "a computer-age detective story, instantly fascinating [and] astonishingly gripping" (Smithsonian). Cliff Stoll was an astronomer turned systems manager at Lawrence Berkeley Lab when a 75-cent accounting error alerted him to the presence of an unauthorized user on his system. The hacker's code name was "Hunter"—a mysterious invader who managed to break into U.S. computer systems and steal sensitive military and security information. Stoll began a one-man hunt of his own: spying on the spy. It was a dangerous game of deception, broken codes, satellites, and missile bases—a one-man sting operation that finally gained the attention of the CIA . . . and ultimately trapped an international spy ring fueled by cash, cocaine, and the KGB.

- Packed with hundreds of practice questions to develop higher level mathematical skills -
Covers the updated SQA Higher specification, for first assessment in 2019 - Starts with a Chapter Zero that revises all necessary algebraic and numeric skills from National 5 - Every chapter ends with Exam Practice Exercises that mirror the question types in the SQA exams -
Every third chapter ends with a cumulative Home Exercise for revision and recall of the topics covered across all chapters up to that point - Includes Specimen Exam Papers 1 and 2 at the end of the book - Answers for all questions are in the back of the book; answers for the Home Exercises and Specimen Exam Papers are available online

The Busy Ant Maths Pupil Book 3A contains three levels of differentiated challenge built-in to each lesson as well as extra consolidation and extension activities to ensure rapid progression for every child.

This book, along with General Book 3G covers in depth the entire contents of the General Course. It is also an invaluable resource which can easily be used to cover the outcomes of the new CfE National 4 course being introduced to Scottish schools. It is a pupil friendly book and is one of our biggest selling resources. We found that pupils who struggled with the complexities of other General resources on the market, and who found the sudden change of pace and the level of difficulty too great to cope with, felt a lot more comfortable with our 3G and 4G textbooks. In Book 3G, we truncated the work in some chapters, for example: Pythagoras - Hypotenuse only Circle work - Circumference only Trigonometry - Tangent only (Tan tables at back of book), in order to allow pupils to have access to these topics and feel confident with the work without burdening them with all the "tricky bits"! Though the missing topics from these chapters were covered in the Extension Materials in 3G, they are re-produced in this book with changed numbers.

Introduce mastery learning in maths with ease, confidence and minimal cost - and you can still use TeeJay's fun and colourful practice questions! Written by maths mastery specialists, this step-by-step teaching pack will raise attainment, reduce your workload, develop your pedagogical knowledge and give a new lease of life to your TeeJay textbooks! - Use your TeeJay books to deliver mastery lessons: There's no need to buy new textbooks!
