 The 8 Dimensions of Leadership Map is a quick assessment to give you an idea of your own style. Different business situations often require different styles of leadership. Here's an overview of lessons you can learn from each of the eight dimensions ...

Don't Be a One-Dimensional Leader! To be an effective leader you need to know your strengths, but that's only part of the story. You also need a broad perspective on all the behaviors needed to be an effective leader. This book provides both. Using the third-generation DISC® online personality assessment, one of the most scientifically validated tools available, The 8 Dimensions of Leadership helps you identify your primary leadership dimension. Whether you are a Pioneering, Energizing, Affirming, Inclusive, Humble, Deliberate, Resolute, or Commanding leader, the authors help you understand the psychological drivers, motivations, and 'blind spots' characteristic of your style. But no single style will take you all the way. A Humble leader may have a hard time making tough decisions. A Commanding leader may run roughshod over potential allies. The authors detail the lessons all leaders can learn from each style, enabling you to craft a multidimensional approach to becoming the leader you aspire to be.

How can people best develop their leadership skills to match their personality, to amplify their strengths, and to compensate for their weaknesses? This is the first book to answer this question with the latest version of the DISC model of human behavior, which is one of the most widely used, most scientifically based, and most effective approaches to assessing and improving leadership styles and skills.

You have the capacity to become an extraordinary leader, if you are willing to embrace a deeper definition of leadership and take action to apply it. In The 4 Dimensions of Extraordinary Leadership, Jenni Catron, executive church leader and author of Clout, reveals the secrets to standout leadership found in the Great Commandment: "Love the Lord your God with all your heart and with all your soul and with all your mind and with all your strength." Weaving a winsome narrative filled with inspiring real-life stories, hard-won wisdom, and practical applications, Catron unpacks four essential aspects of growing more influential: your heart for relational leadership, your soul for spiritual leadership, your mind for managerial leadership, and your strength for visionary leadership. Leadership isn't easy, but it is possible to move from ordinary to extraordinary. Jenni Catron shows the way.

5-D Leadership dispels the myth that there is only one way to be an effective leader as it reveals the real mystery behind ongoing leadership effectiveness: the ability to draw from a variety of leadership approaches, to respond to whatever each unique situation demands. Bringing together real-world examples - from Harley-Davidson to Nestle, New York mayor Rudy Giuliani to Antarctic explorer Ernest Shackleton - authors Campbell and Samiec explore the five key Leadership Dimensions employed by today's most successful leaders: Commanding, Visioning, Enrolling, Relating, and Coaching. Profiling seven prevalent business challenges - including rapid growth, sudden crises, recent mergers, and civil war - they reveal when and how to use each of the five Leadership Dimensions.

In this book the authors examine the various orientations of leadership, and demonstrate that true, effective leadership is only achieved when it is consistent with ethical and moral values.

Annotation.

This book illuminates many of the core values, beliefs, and principles that can guide, sustain, and inspire leaders during difficult times.

Although leadership theories have evolved to reflect changing social contexts, many remain silent on issues of equity, diversity, and social justice. Diversity and Leadership, by Jean Lau Chin and Joseph E. Trimble, offers a new paradigm for examining leadership by bringing together two domains: research on leadership and research on diversity to challenge existing notions of leadership and move toward a diverse and global view of society and its institutions. This compelling book delivers an approach to leadership that is inclusive, promotes access for diverse leaders, and addresses barriers that narrowly confine our perceptions and expectations of leaders. Redefining leadership as global and diverse, the authors impart new understanding of who our leaders are, the process of communication, exchange between leaders and their members, criteria for selecting, training, and evaluating leaders in the 21st century, and the organizational and societal contexts in which leadership is exercised.

A fresh look at what it means to lead from two of the biggest names in leadership In these turbulent times, when the very foundations of organizations and societies are shaken, leaders need to move beyond pessimistic predictions, trendy fads, and simplistic solutions. They need to turn to what's real and what's proven. In their engaging, personal, and bold new book, Kouzes and Posner reveal ten time-tested truths that show what every leader must know, the questions they must be prepared to answer, and the real-world issues they will likely face. Based on thirty years of research, more than one million responses to Kouzes and Posner's leadership assessment, and the questions people most want leaders to answer Explores the fundamental, enduring truths of leadership that hold constant regardless of context or circumstance-leaders make a difference, credibility, values, trust, leading by example, heart, and more Shows emerging leaders what they need to know to be effective; fans of The Leadership Challenge will find a dynamic new look at the real challenges leaders face today Drawing from cases spanning three generations of leaders from around the world, this is a book leaders can use to do their real and necessary work-bringing about the essential changes that will renew organizations and communities.
