The biology of big | Science

Big Science, style of scientific research developed during and

after World War II that defined the organization and character

of much research in physics and astronomy and later in the

biological sciences. Big Science is characterized by large-

scale instruments and facilities, supported by funding from

government or international agencies, in which research is

conducted by teams or groups of scientists and technicians.

Big Science | science | Britannica

Big science is a term used by scientists and historians of

science to describe a series of changes in science which

of our modern industrial nations during and after World War II, as scientific progress increasingly came to rely on large-scale projects usually funded by national governments or groups of governments. Individual or small group efforts, or Small Science, are still relevant today as theoretical results by individual authors may have a significant impact, but very often the empirical v

Big ideas of Science Education were published by Wynne Harlen and others in 2010. These ideas distil down scientific knowledge into ten guiding principles that we can use to explain a diversity of scientific phenomena. The big ideas are lenses by which we can make sense of the world – an important goal for science education.

Little Science, Big Science is a book of collected lectures given by Derek J. De Solla Price, first published in 1963. The book presents the 1962 Brookhaven National Laboratory Pegrarn Lectures, a series of lectures dedicated to discussing science and its place in society. Price's goal in the lectures is to outline what it may look like for science to be analysed scientifically, by applying methods of measuring, hypothesizing, and deriving to science itself. With this goal in mind, he sets out to

Little Science, Big Science - Wikipedia

Whilst big ideas help to frame the ultimate goals of science education, it's important to recognise that big ideas cannot be taught directly. This sounds a bit odd, but just as we can't teach students to be "problem solvers", we can teach them a body of knowledge that enables them to solve problems in a specific domain.

Building a curriculum towards big ideas | the science teacher
The Science Museum is a major museum on Exhibition Road in South Kensington, London. It was founded in 1857 and today is one of the city's major tourist attractions, attracting 3.3 million visitors annually. Like other publicly funded national museums in the United Kingdom, the Science Museum does not charge visitors for admission, although visitors are asked for a donation if they are able.
