Since the end of the Second World War—and particularly over the last decade—Japanese science fiction has strongly influenced global popular culture. Unlike American and British science fiction, its most popular examples have been visual—from Gojira (Godzilla) and Astro Boy in the 1950s and 1960s to the anime masterpieces Akira and Ghost in the Shell of the 1980s and 1990s—while little attention has been paid to a vibrant tradition of prose science fiction in Japan. Robot Ghosts and Wired Dreams remedies this neglect with a rich exploration of the genre that connects prose science fiction to contemporary anime. Bringing together Western scholars and leading Japanese critics, this groundbreaking work traces the beginnings, evolution, and future direction of science fiction in Japan, its major schools and authors, cultural origins and relationship to its Western counterparts, the role of the genre in the formation of Japan ' s national and political identity, and its unique fan culture. Covering a remarkable range of texts—from the 1930s fantastic detective fiction of Yumeno Kyūsaku to the cross-culturally produced and marketed film and video game franchise Final Fantasy—this book firmly establishes Japanese science fiction as a vital and exciting genre. "An utterly satisfying examination of the business of popular music." —Nathaniel Rich, The Atlantic There ' s a reason today ' s ubiquitous pop hits are so hard to ignore—they ' re designed that way. The Song Machine goes behind the scenes to offer an insider ' s look at the global hit factories manufacturing the songs that have everyone hooked. Full of vivid, unexpected characters—alongside industry heavy-hitters like Katy Perry, Rihanna, Max Martin, and Ester Dean—this fascinating journey into the strange world of pop music reveals how a new approach to crafting smash hits is transforming marketing, technology, and even listeners ' brains. You ' ll never think about music the same way again. A Wall Street Journal Best Business Book

Readers gain a solid understanding of Newtonian dynamics and its application to real-world problems with Pytel/Kiusalaas' ENGINEERING MECHANICS: DYNAMICS, 4E. This edition clearly introduces critical concepts using learning features that connect real problems and examples with the fundamentals of engineering mechanics. Readers learn how to effectively analyze problems before substituting numbers into formulas. This skill prepares readers to encounter real life problems that do not always fit into standard formulas. The book begins with the analysis of particle dynamics, before considering the motion of rigid-bodies. The book discusses in detail the three fundamental methods of problem solution: force-mass-acceleration, work-energy, and impulse-momentum, including the use of numerical methods. From Syria and Iraq to Ukraine, from AfPak to Libya, from Iran to Russia, and from the Persian Gulf to China, foreign correspondent Pepe Escobar, author of The Roving Eye column for Asia Times/Hong Kong, crisscrosses what the Pentagon calls the "arc of instability." As Escobar tells it in the introduction, "the columns selected for this volume follow the period 2009-2014 - the Obama years so far. A continuum with previous volumes published by Nimble Books does apply. Globalistan, from 2007, was an extended reportage/warped travel book across the Bush years, where I argued the world was being plunged into Liquid War - alluding to energy flows but also to the liquid modernity character of post-modern war. Red Zone Blues, also from 2007, was a vignette - an extended reportage centering on the Baghdad surge. And Obama does Globalistan, from 2009, examined how the hyperpower could embark on a "change we can believe in." The outcome, as these columns arguably reflect, is Empire of Chaos - where a plutocracy progressively projects its own internal disintegration upon the whole world." "You will find some key overlapping nations/themes/expressions/acronyms in these columns; Iran, Iraq, Syria, Afghanistan, Pakistan, Central Asia, China, Russia, Ukraine, Pipelineistan, BRICS, EU, NATO, GCC, the Global South, GWOT (the global war on terror), The New Great Game, Full Spectrum Dominance. You will also find a progressive drift towards not conventional war, but above all economic war - manifestations of Liquid War." Incrementally, I have been arguing that Washington's number one objective now is to prevent a full economic integration of Eurasia that would leave the U.S. as a non-hegemon, or worse still, an outsider. Thus the three-pronged strategy of "pivoting to Asia" (containment of China); Ukraine (containment of Russia); and beefing up NATO (subjugation of Europe, and NATO as Global Robocop)." Book the ultimate trip to the Empire of Chaos, and see how the U.S. - and the West - are tackling the emergence of a multipolar world.
