Trane's ductless mini-split heat pumps have Seasonal Energy Efficiency Ratings (SEER) ranging from 16.00 to 22.00, making the systems remarkably efficient and environmentally friendly. Quiet Operation. Specially designed air vents efficiently reduce sound to provide quiet comfort as low as 26 dB, for whisper-quiet operation. Design Flexibility

4MXW6 Ductless Mini-Split Heat Pumps | Trane®
Trane's split system has quality and reliability built-in. An indoor section and matching outdoor section are connected by refrigerant tubing (hence the name "split"). The indoor section consists of a fan, indoor cooling coil, heating section, and filter while the outdoor section houses the compressor and condenser. Energy performance is similar to packaged rooftop systems with a bit more installation flexibility; it's a combination for reliable operation and easy service.

Split System | Trane Commercial
Trane's ductless mini-split indoor units have Seasonal Energy Efficiency Ratings (SEER) ranging from 16.00 to 38.00, making the systems remarkably efficient and environmentally friendly. Quiet Operation. Specially designed air vents efficiently reduce sound to provide quiet comfort as low as 22 dB, for whisper-quiet operation. Design Flexibility

Ductless Heat Pumps | 4MXW38 Heat Pump | Trane® Residential
Ductless systems allow for flexibility. A single-zone (also called a mini-split) ductless system allows you to control the temperature of one room by connecting an outdoor unit to an indoor unit, with no ductwork needed. An outdoor mini-split unit is placed outside your home and is connected to an indoor mini-split unit by small cables and a refrigerant line through a hole in the wall.
