Despite the current survivor-affirming awareness around sexual violence, child sexual abuse, most notably when it ' s a family member or friend, is still a very taboo topic. There are approximately 42 million child sexual abuse survivors in the U.S. and millions of bystanders who look the other way as the abuse occurs and cover for the harm-doers with no

accountability. Documentary filmmaker and survivor of child sexual abuse and adult rape, Aishah Shahidah Simmons invites diasporic Black people to join her in transformative storytelling that envisions a world that ends child sexual abuse without relying on the criminal justice system. *Love WITH Accountability* features compelling writings by child sexual abuse survivors, advocates, and Simmons ' s mother, who underscores the detrimental impact of parents/caregivers not believing their children when they disclose their sexual abuse. This collection explores disrupting the inhumane epidemic of child sexual abuse, humanely.

Many public and private sector organizations around the world have initiated a reliability and asset management program to drive efficiencies, mitigate risks and manage the asset throughout the entire lifecycle. However, it's well known that more than seventy percent of those implementations fail to become a long-term sustainable solution, and some of them never get off the ground! The development and implementation of a reliability and asset management program most often focuses on the technical aspects of the journey and not the cultural journey itself. The journey is filled with challenges, barriers, difficult decisions, successes and failures. How does one understand these items and how should they be approached in advance of the

journey?The Uptime® Elements Implementation Virtual Special Interest Group (vSIG) was assembled to analyze the reliability and asset management program journey to glean and present the wisdom, advice and recommendations of those who have made the journey utilizing the five domains of the Uptime Elements. Contributors to this implementation guide have made "the journey," and thus gained experience in developing, implementing and/or operating a reliability and asset management program. They've experienced the ups and downs, the successes and failures and the barriers and challenges, and have the change management experience required to create valuable and sustainable reliability and asset management solutions. The output of this vSIG has resulted in this Uptime Elements Implementation Guide. This

**CLARINDA FINCH HATES CHANGE** As the newly elected mayor of Maple Notch, the war widow must lead her town through the dark days of World War II. But where she finds comfort in tradition, the town council insists on trying new ways of handling the homefront challenges. Her most untraditional opponent? Councilman Ralph Quincy. High school principal Ralph never expected to become a friend to Clarinda and her family. But as she spars with him over the war effort, the smart, spirited mayor is the most compelling woman he's ever known. Can they put aside their differences and fight for both their town and a future together't

nights. Furthermore, he is confused about his awakening sexuality, repressed totally as it is by the Catholic Church in Ireland of the sixties and by his vow of chastity. Years later, he is faced with a momentous decision: he must decide once and for all if the price he has paid has really been worth it . . .

INSIDE will strike a chord with many who grew up in the fifties and sixties, who remember the smells of the classroom and dancehall in those pre-deodorant days, the taste of fried bread and the sounds of the hymns and popular songs of the era - not to mention the swish of the leather strap. INSIDE is a must for those who have had their own experience of the Brothers - or who may have heard about them in recent news stories worldwide - and who would like to know what made them tick, what made them so successful in their heyday,

highlights the family links while providing a detailed individual treatment of each country which reveals their individual personalities. This updated second edition includes two new countries (Botswana and Malta) and the appendices explore all other mixed jurisdictions and contain a special report on Cameroon.

The text makes the case for a revival of general jurisprudence in response to globalisation.

Every year, around the world, between 250,000 and 500,000 people suffer a spinal cord injury (SCI). Those with

an SCI are two to five times more likely to die prematurely than people without a spinal cord injury, with worse survival rates in low- and middle-income countries. Dynamic aerobic requires integrated physiologic responses across the musculoskeletal, cardiovascular, autonomic, pulmonary, thermoregulatory, and immunologic systems. Moreover, regular aerobic exercise beneficially impacts these same systems, reducing the risk for a range of diseases and maladies. This book will present comprehensive information on the unique physiologic effects of SCI and the potential role of exercise in treating and mitigating these effects. In addition, it will incorporate work from scientists across a number of disciplines and have contributors at multiple levels of investigation and across physiologic systems.

Furthermore, SCI can be considered an accelerated form of aging due to the severely restricted physical inactivity imposed, usually at an early age. Therefore, the information presented may have a broader importance to the physiology of aging as it relates to inactivity. Lastly, the need for certain levels of regular aerobic exercise to engender adaptations beneficial to health is not altered by the burden of an SCI. Indeed, the amounts of exercise necessary may be even greater than the able-bodied due to ' passive ' ambulation. This book will also address the potential health benefits for those with an SCI that can be realized if a sufficient exercise stimulus is provided.
